

ACCESSORY CASES FOR 4 AND 12-TON SCHP

A strong grip for a safe and easy dismantling.

AS-SCHP 12T

APPLICATIONS

A separator is a complementary tool to a claw extractor when the latter does not have sufficient grip. A perfect grip on the back of parts, using bevelled blades, reduces the force necessary for dismantling and avoids damaging the shaft's contact surface

ADVANTAGES

- Robust design ensuring a long life for the separation blades.
- After separation by tightening the two blades, turning the separator enables greater force to be used without deforming the blades for the complete extraction of the part.
- Extensions are included to compensate for the distance of the support face.
- Easy centering of the piston on the shaft with integrated point.
- Two versions are available depending on the required power: 4 and 12 tons.
