

Interflon Degreaser EM30+

High yield multi-purpose degreaser with F-Active technology

Very powerful, fast-acting cold degreaser for use in the food processing industry. Has a mild odour. Evaporates without leaving any residue. Evaporates slowly so that even persistent dirt is removed.

Nonfood Compounds
Program Listed K1,K3
Registration 128500

Effectively breaks down the composition of heavy greases, oils, grime, dirt, graphite and carbon residue. Removes tar, partly dried paint, glues, resins, polymers, gasket sealant, adhesives, waxes, bitumen, dyes, inks, water based paints, labels and graffiti too.

Key Advantages:

- Highly versatile
- Powerful cleaning properties
- Quick and effective cleaner
- Evaporates leaving behind no residue
- Easy to use aerosol application

Applications:

- Engines
- Gear Wheels
- Bearings
- Hard Stone
- Chains
- Conveyor belts
- Slide-ways
- Many more...

Interflon Degreaser EM30+

High yield multi-purpose degreaser with F-Active technology

Interflon Degreaser EM30+ is listed NSF-K1, K3. Therefore can be used safely to meet the requirements for cleaning and degreasing cleanrooms. Excellent replacement for acetone and other hazardous cleaning systems.

Do not use on synthetic materials and rubber.

Nonfood Compounds
Program Listed K1,K3
Registration 128500

- Suitable for use in HACCP environments (NSF-K1, K3)
- Suitable as an immersion cleaner
- Available in "Bulk" and aerosol formats

Practical example:

Quick removal of graffiti from a train carriage

The iron particles burn into the dirt on the surface of the locomotives covered in graffiti. This creates a hard dirt crust that has to be spray painted.

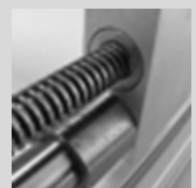

Our solution

Interflon Degreaser EM30+

Result:

Spray graffiti with Interflon Degreaser EM30+, allow to soak in for four minutes and then remove with a clean cloth. Repeat if necessary. No need to re-spray the locomotive. This saves a lot of time and money.

A cost saving of € 8.110,- per carriage.
