

# Interflon Food Grease 2

Multi-purpose, food grade grease with MicPol® technology

High performance, multi-purpose grease with MicPol® technology. Extends lubrication intervals, lowers maintenance costs and reduces power consumption. Excellent adhesion properties for long lasting protection against wear, rust and oxidation.

Nonfood Compounds  
Program Listed H1  
Registration 123822

A single lubricant for use as general lubrication of machine parts with slow to moderate movements. Suitable for light to heavy loads. Also for use in wet environments, such as the beverages and food industry or pharmaceutical plants.

## Key Advantages:

- Can be used in HACCP environments (NSF-H1)
- Reduces friction and wear
- Very good corrosion protection
- Clean in use

## Applications:

- Bearings
- Joints
- Crown wheels
- Bolts
- Open gear wheels
- Guide-ways
- Spindles
- Many more...

# Interflon Food Grease 2

Multi-purpose, food grade grease with MicPol® technology

High performance, coupled with long stand times and superior protection. Meets clean room and HACCP certified environments guidelines. All basic components used meet the requirements for use with occasional contact with food.

Nonfood Compounds  
Program Listed H1  
Registration 123822

- Wide temperature range: -20°C to +150°C
- Excellent resistance to water, steam and dirt

## Practical example:

### Lubrication of bottle conveyor bearings

The lubricant in the bottle conveyor bearings was washed out despite the rubber seals, resulting in at least 20 cases of bearing damage a year, with at least 3 production outages.

### Our solution

Interflon Food Grease 2

### Result:

After applying Interflon Food Grease 2, there has been no bearing damage over a period of one year. Stable grease that cannot be washed out and prevents intrusion of dirt and grease. No more production outages and maintenance costs have decreased significantly.

€ 11.550,- saved on stainless steel bottle conveyor belt
