

Interflon Fin Grease

Transparent, multi-purpose grease with MicPol® technology

Clear white penetrating grease, economical, aerosol can spray in every position. For the lubrication and assembly of machine and parts, such as bearings, spindles, guideways, gearboxes, gear rings, cables, screwed connections, hinges, axles, gudgeons, toothed belts, locking pins and many other parts.

1 product that replaces up to 7 conventional products:

- Assembly Grease
- Adhesion Grease
- Chain Grease
- White Grease
- Spray Grease
- Battery Terminal Grease
- Gearbox Grease

When combined with Interflon Fin Super, this replaces nearly all the products you use for maintenance.

Applications:

- Bearings
- Hinges
- Spindles
- Gudgeons
- Cables
- Screw Connectors
- Chains and many more...

Interflon Fin Grease

Transparent, multi-purpose grease with MicPol® technology

Clear white penetrating grease, economical, aerosol can spray in every position. For the lubrication and assembly of machines and parts, such as bearings, spindles, guideways, gearboxes, gear rings, cables, screwed connections, hinges, axles, gudgeons, toothed belts, locking pins, and many other parts.

- Extended lubrication intervals
- Excellent penetration properties
- Water and steam resistant
- Prevents dirt, dust and water ingress
- Lower grease consumption
- Does not damage rubber or plastics
- No side effects when painting

Practical example:

Treatment of moulds and dies

Major wear of moulds and dies because conventional grease hardens under high temperatures. Monthly technical stoppage required to clean the modules.

Our solution

Interflon Fin Grease
First clean with Interflon Metal Clean.
Replace used grease with food-safe Interflon Fin Grease.

Result:

The maintenance interval with Interflon Fin Grease has been set to once every two months rather than monthly. There are no more worries about daily production.
