

Interflon Metal Clean F

Powerful food grade cleaner with F-Active technology

Powerful, readily biodegradable food grade (NSF-H1) cleaning and degreasing agent, also while processing food stuff or pharmaceuticals. With pressure spray, so that dirt and grease in hard to reach places can be easily removed, without leaving any residue.

Interflon Metal Clean F cleans and degreases surfaces, machine parts and chains, but can also be used as a contact cleaner. Comes with NSF-H1 certificate, so can be used while processing food stuff or pharmaceuticals. Is particularly suitable for removing oil, grease, tar, resin, silicones, ink, brake fluid, paint and glue residues, etc. Frequently used as replacement for acetone, white spirit, paraffin, trichloroethylene and toluene, allowing to reduce number of cleaners.

Key Advantages:

- Cleans and degreases rapidly and effectively
- Evaporates quickly and leaves no residue
- Pleasant odour
- Non-corrosive cleaner
- Aerosol can be used in every position

Applications:

- Machine parts
- Chains
- Brake systems
- Gear wheels
- Bearings
- Tools
- Locks
- Many more...
